PATENTS

---

- 2004 Cross Press Fixation System (Produced by Arthrex Inc., Naples, FL, USA – Codice: AR-1368-30).  
2006 Method of arthroscopic biologic knee resurfacing using PRP strengthened with fibrin glue (Inventors: G. Milano, G. Michel, S. Naudin, H. Linden, R. Schmieding): U.S. Patent No. 60/968,272.

RESEARCH ACTIVITY

---

- Biology of cartilage repair
- The role of growth factors in cartilage repair
- Biomechanics of soft tissues
- Biology and biomechanics of knee ligament reconstruction
- Biomechanics of fixation techniques for knee ligament reconstruction
- Biodegradable materials in shoulder surgery
- Double-row rotator cuff repair
- The role of acromioplasty in rotator cuff repair
- Biologic augmentation in rotator cuff repair
- Imaging in shoulder instability
- Imaging in rotator cuff repair
- Factors affecting outcome in rotator cuff repair
